# Kamugisha Ali

## Full Stack Developer & UI/UX Designer

## Profile

Full-stack developer based in Entebbe, Uganda with over 3 years of experience building web applications, mobile applications and management systems. I build seamless user experiences on robust, scalable architectures, with a focus on clean, efficient code and current industry best practices.

## Experience

### Senior Full Stack Developer · Vortexx

2023 – Present · Entebbe, Uganda

Leading development of enterprise web applications using React, Next.js and Node.js, and architecting scalable solutions.

- Reduced application load time by 60% through optimisation
- Led a team of 5 developers on a major product redesign
- Implemented a CI/CD pipeline that cut deployment time by 80%

### Full Stack Developer · Vortexx

2024 – Present · Entebbe, Uganda

Developed and maintained multiple client projects using modern web technologies, collaborating with designers and product managers.

- Built 15+ production-ready web applications
- Improved code quality with comprehensive testing
- Contributed to open-source projects

### Andabye · Systems

2023 – Present · Kampala, Uganda

Created responsive user interfaces and implemented interactive features for a range of web applications.

- Developed a reusable component library
- Improved accessibility compliance to WCAG 2.1
